

## **instruNet World PLUS (iW+)**

iW+ is a Very reasonably priced yet powerful and easy to use data acquisition software program for Windows (not Mac) that enables one to digitize, plot, control, analyze, and save to disk A/D, D/A, and digital I/O data from instruNet hardware. Additionally, it enables one to define their own instrument front panel with buttons, popup menus, edit fields, dynamic text, text editor regions, and waveform graphs. For details, see URL [www.instruNet.com/plus](http://www.instruNet.com/plus)

## **instruNet World**

This strip chart/oscilloscope application software is included FREE with every instruNet i2x0 controller card.

## **Direct To Excel Panel**

The "Direct To Excel" program is compatible with Excel >=8 (Office >=97) and Windows >= 98 (not 95). This software is included with instruNet software version >= 2.0 and requires iW+.

## **DASYLab**

InstruNet is compatible with DASYLab Version >= 4.0, with the instruNet driver, on Windows 95/98/Me/Nt/2k/Xp (must specify "DASYLab with instruNet Driver" with DASYLab supplier). For more information on DASYLab, please see [www.dasylab.net](http://www.dasylab.net)

## **HP Vee**

InstruNet is compatible with HP Vee Version >= 4.0 on Windows 95/98/Me/Nt/2k/Xp. The instruNet to HP Vee interface files are included with instruNet software version >= 1.4.

## **LabVIEW**

InstruNet is compatible with LabVIEW >= 4.0 on Windows 95/98/Me/Nt/2k/Xp and Mac OS >= 8.0. For instruNet-to-LabVIEW interface files, please email [baldwind@shiretech.com](mailto:baldwind@shiretech.com) (he sells the interface files for approx \$200). For more information on LabVIEW, please see [www.ni.com](http://www.ni.com).

## **TestPoint**

InstruNet is compatible with TestPoint Version >= 3.0 on Windows 95/98/Me/Nt/2k/Xp. For more information on TestPoint, please see [www.cec488.com](http://www.cec488.com). The instruNet to TestPoint interface files are included with instruNet software version >= 1.4.

## **C Compiler**
